Message	<p>Dear City Council: I want to object to a portion of the upcoming code change regarding eliminating the off-street parking requirements for development adjacent to a transit line. This is a faulty law and should not be adopted into Salem's code as a community development standard. The City of Salem has no control over the Transit District. The transit lines are not determined by the City. The times of the bus stops are likewise not controlled by the City. Therefore, the City has no control over changes the Transit District makes. This impacts Salem's proposed minimum standards negatively. If transit lines and timing are changed, the development would be left with inadequate off-street parking, There is no way to go back and require that off-street parking to be brought up to minimum standards. The City should have objected to this law when it was first proposed by the State Legislature. There is no way the City can require that the Transit District maintain specific lines and times. Therefore I urge you not to enact this provision. Thank you for your consideration in this matter. Sincerely, Lynnette Martino 296 Gerth Avenue NW Salem, OR 97304</p>
