Message	<p>This is a challenging time to be adjusting the goal post on signs. We are working on numerous projects, a couple in the core, and this holiday season surprise is putting some added stress on projects that are potentially close to breaking points. If this decision could be postponed to early 2024 it would be less stressful on some key projects in the core.</p>

Message	Dear Mayor and City Councilors: Regarding item 4.d. Please consider exempting signs and banners which may be attached to temporary construction fencing from requirements within the sign code. Limiting or disallowing consultants, contractors, and subcontractors from advertising on a site they had or have provided services for is economically detrimental to the small businesses in our community. Thank you for your consideration. Britany Randall Owner and Principal Planner BRAND Land Use
