Subject: Design comments to the "Working Together" Sign
Date: Monday, October 28, 2024 2:43:26 PM

Mr. Mayor & City Council,

My comments are related to the "Council to vote on replacing "Working Together" Sign on River Rd. N and Stark St.

I, Andy Leisinger, RLA, Landscape Architect, was the Landscape Architect who designed the Working Together Sign, back

in 1993. I was selected to design the sign and worked with the City of Salem, City of Keizer and Mr. Dick Witnell. I designed

and coordinated the construction implementation and through the many years of being targeted by drunk drivers, I was

involved with reconstruction coordination with contractors in the early years.

I do understand the concern the two Cities have with the unfortunate destruction of the Gateway sign, but I do feel there

are design possibilities, that could be discussed.

If you want to explore those options, I am available and still a practicing Landscape Architect and would be glad to work

with the Cities to review different designs.

Thank you for your time.

Andrew J. Leisinger, RLA
