Please, would you be so kind as to require the developers to wait the requisite five years before developing the property. Also, please don't let the forced annexation of the neighboring property for a road happen. I mostly don't understand all the laws and such, but I do understand that people matter most in this life. I feel like taking someone's property, especially property that has been generously used for the community, is very wrong. Please see the people and not the demands as most important. Thank you kindly for listening.

Sincerely,
Robyn Saye

Rushing the 5 year wait period is not in the best interest of the Salem Community. Thousands of people have been brought better quality of life by teams and families currently occupying the land to be annexed.

Keep our community in favor of upholding law sans even more a place pro-kids and pro-families.
