Subject: Eliminating Minimum Parking Requirements
Date: Monday, April 10, 2023 1:59:43 PM

Do not do away with minimum parking requirements!

Doing so only benefits developers, not the citizens of Salem. I am sick and tired of being asked to pay for parking downtown, to accept increases in utility taxes, and to be asked for a \$300 million bond(which I voted for) only to be slapped in the face, by a City Council I voted for, with giveaways to developers under the pretense of environmental concern. Downtown does not need added pressure for the few parking spaces available to the public. If a developer wants to build downtown, the developer should have the money to provide parking for the building residences.
