

Basic Mix

PGE’s Basic Mix – the standard electricity offering – is sourced from a mix of energy generation types, including fossil fuel, wind, solar, and hydroelectric. Starting in 2020, the basic mix is expected to be 45 percent carbon neutral and 20 percent renewable. The profile of the basic mix is expected to include more carbon neutral and renewable energy sources over time.

Basic Mix	2020-2024	2025-2029	2030-2034
Carbon Neutral	45%	52%	60%
Renewable	20%	27%	35%
