Message	Regarding proposed skating rink: First, I want to commend you for excellent planning for the eclipse. All went so well!! About the skating rink: If the land where this is to be built is now vacant and there is wildlife living there, I hope you will NOT build it there. The riverfront should be where wildlife thrives. It is being over developed. Why not have a skating rink in an area of Salem that needs economic development instead ruining what little open space we have left on the riverfront? Thank you for your consideration of this matter. Aileen Kaye
