Yes

5. About you

5. Please describe your background and experience as it relates to city affairs. Please be specific if your experience relates to any volunteer or paid positions which interface with a city government.

I have owned a business in Salem for almost 10 years and my family has owned a business here for 25+ years. Being a small business owner and growing up in a business atmosphere, I have seen how cities and businesses can work together as a community to help everyone in the city thrive together. I currently sit on the NGRAB advisory board, and have been there since 2017. I have learned much about budgets, projects, planning, and executing when it comes to government spending.

6. City Councilors have many responsibilities and serve in a volunteer capacity. Please discuss your availability and commitment to meet the needs of the community in this role. How much time do you have to give?

I own my company, and have the ability to make my own schedule. I have at least 20 hours per week to attend meetings.

7. Describe your interest in the role. What would you look forward to?

My family has lived in Ward 7 since 1960. The home I live in was bought by my grandfather, my father grew up in the home, then he raised me in the home, and now I am raising my son in the home. Ward 7 is a neighborhood that I love. I look forward to doing everything I can to make the Ward cleaner, safer, and more productive.

8. What do you think are some of the most important issues facing the city today? What are your views on those issues?

I think like most cities we have a problem with a lack of housing for people in need. I don't know exactly how to fix the problem, but I think we as a community should be working hard to come up with a plan to help the effort to create housing. Affordable housing is also connected to that. The homeless problem we have in are city is very troubling. Also connected to housing. From what I hear from people in my area is that crime is on the rise, and they would like to see something done about that, and I agree. Congestion is also a problem that should be addressed, and I hope to hear peoples ideas on how to fix it.
