Subject: Covid-19 Pandemic: Homeless Population

Dear Councilors,

Please do not forget to address the homeless when you consider measures Salem should take to curb the pandemic. You should be advised by competent medical authorities on whether your proposed measures properly remove the homeless from the transmission chains. Leaving them in the city center, unsheltered, without toilet facilities, while shutting down the few businesses that allow them to eat and drink would be inhumane.

Please consider allowing groups to feed the homeless -- wherever it is possible to do so -- without regard to whatever your plan or strategy was before the pandemic came to us.

Please consider allowing the homeless to erect tents -- wherever it is possible to do so -- without regard to whatever your plan or strategy was before the pandemic came to us. Shelters would be hotbeds of contagion and should be shut down.

You must consider measures to allow the homeless to be "quarantined" somehow -- you have to testing capability to test them wholesale, and leaving them to wander and continue to catch and transmit this virus would be foolish. Whatever measures you consider for the housed must have a parallel in the homeless community.

Subject: Point of concern for emergency meeting

Hello,

I wanted to bring a comment of concern during this crucial time in our community. The fact that colleges, both community colleges and state schools, are still open and fully functional. By choosing to remain open, it is putting their staff, employees and communities at risk.

Other states are being much more proactive in combating this pandemic. And it doesn't seem the governor nor the colleges in Oregon are taking this situation seriously. Additionally, they have only moved the start of Spring term 1 week later than originally planned while staying open and fully operational. I have not heard the governor make a single comment about the expectations of the colleges in the state. And I hope the council uses this emergency meeting to address this lack of responsibility from Chemeketa Community College and other colleges in the state.

This seems to be a disregard for truly making an effort to stop the spread of this sickness and protect the communities we pledge to serve.

I look forward to hearing your remarks tonight during the council meeting.

Best wishes
Ellen

Subject: Salem / state/ nation/ Covid 19 crisis

All,

Salem City Council emergency meeting.

1) Please address the needs of unsheltered citizens. Places they can go to. A place to pitch a tent. Food. Water. Restrooms. Hand washing.

Fliers. Educating. Testing for them. Who is advocating for their well being? People who are too mentally ill to advocate for themselves? Too sick to understand.

2) This past Sunday I saw another person i had known from Oregon State Hospital, discharged and living downtown. I talked with him. He said he got out in February. Living by Rite Aid now, too.

3) No response from County Commissioners so far to this crisis to citizens or in regard to unsheltered. I can only hope they are working with the city.

3) What advice is the governor or Oregon Health authority giving for unsheltered ?

4) Thanks to those who have been to the shelters and are involved. Councilors; Hoy, Nordyke, Anderson, Leung, City Manager Powers. Hope I didn't miss anyone.

Awaiting response. It takes a village.

Advocates can assist too.

Respectfully,

Lorrie Walker
Guardian, Advocate,
Salem, Or.

Message	In light of the COIVD-19 I am imploring the Council to address our homeless community. They are gathered together throughout Salem. Since all gatherings are being canceled, can't they camp out at cascade gateway park (or another large area that can't be used right now) so they can actually practice some social distancing. Thank you

Subject: Covid 19 meeting

Good late afternoon,

I am writing to encourage you all to be bold tonight in your decisions on how to handle our unsheltered population and Covid 19.

I feel it is imperative that at least temporarily the unsheltered be given a tent and sleeping bag to disperse from the downtown area and spread out.

We have only begun to see this virus spread, in the days ahead it will only increase.

We must do what is humane and right. We are taking drastic measures for our sheltered community. We need to do the same for our vulnerable unsheltered.

In hopes that higher angels prevail tonight.

Respectfully submitted,
Pamella Watson

Subject: Public Testimony

How is the distancing helping when my husband still has to go to work and is exposed to all his coworkers? He brings home anything he is exposed to and I have COPD and heart valve issues and am on supplemental oxygen, so anything he is exposed to I am exposed to unless he lives in the garage. It seems like platitudes to close restaurants and bars and schools when people are still going to work and exposed to potential virus due to asymptomatic carriers. And why are they saying anyone who wants a test can get one when my own dr told me they do not have tests available to the public?
