Subject: Pedestrian path through Pioneer Cemetary

Dear Councilor Nordyke:

We are writing to express our support for creating a pedestrian path through Pioneer Cemetery, connecting Rural and Hoyt Streets. We are avid walkers who live in South Central Salem. Presently, we must walk along Commercial Street to travel between the Fairmount and Candalaria neighborhoods. Commercial Street has heavy traffic, resulting in significant noise, pollution, and risk of injury from cars and bikes traveling along Commercial Street. Developing a pedestrian path through Pioneer Cemetery would allow walkers and joggers to avoid travel along Commercial Street, creating healthier and safer conditions for pedestrians.

Thank you for your consideration.
Allison Boomer and Marshall Dunst

Subject: Passage above the Pioneer Cemetery

Categories: Council Dox

Hello, everyone, thank you for your interest in this matter.

We live on Fairmount Hill near the Park. We intended to attend the meeting on Monday evening. Unfortunately, i am 76 and Gary 84 and we were advised to stay home, to be on the safer side, not to contaminate or be contaminated.

I am one of the volunteers who attended the Cert Training with Roger a few years back. At the time, Roger was quite insistant regarding having open passage between our neighborhood and Candalaria in the event of a major earthquake. We were all in agreement. Roger was recommending having a container in Fairmount Park, stocked with emergency food and supplies which could be shared by both neighborhoods as well as an opening which would allow emergency vehicles and first responders to go back and forth. We are still all waiting for such an opportunity!

Also, Fairmount Park is THE park for both neighborhoods and Candalaria was cut off when gates were set up as an overreaction to a one time episode of vandalism. Just not fair.

Both sides of the cemetery would still be protected if the fenced passageway would be open at each end.

Please, pretty please, make this happen this time. Safety and good fellowship could serve us all.

We are so grateful for your efforts to represent us all.

TO: Salem City Council
FROM: Beth Dayton, President Salem Area Trail Alliance
RE: Pioneer Cemetery Connector

I am the president of a large local non-profit that works to help get more people on more trails in the greater Salem Area. Part of SATA's mission is to improve urban connectivity for human powered transportation and recreation, in other words, walking, running and biking. Urban trails and safe places for unstructured healthy outdoor activity are one of the most sought-after amenities in a community, but Salem has lagged behind in creating this type of infrastructure. Little details like opening up the connector across Pioneer Cemetery in south Salem can make a significant difference in the way our residents travel on foot or bike. SATA strongly supports this connection.

Personally, I have commuted by bicycle from south Salem to Salem Hospital for nearly 20 years. There is an excellent quiet, safe route on neighborhood streets parallel to and west of Liberty Street, but this comes to an end at the Pioneer Cemetery, where the only option is to veer down to Commercial Street which is very busy and frankly not safe for cycling. By opening up a route across Pioneer Cemetery human powered traffic can continue on to the edge of downtown on very safe streets such as Saginaw.

Back in 2006 when the City was debating designation of the Croisan Trail as a recreational trail there was concern from neighbors that this could bring in crime, litter and other unwanted use. This in fact has

not happened and today the trail sees extensive use from walkers, joggers, bird watchers, etc. I predict that allowing public access through the cemetery during daylight hours will likewise create a steady presence of legitimate and caring citizens who will vastly outnumber those who might abuse this privilege. Public access trails and walking routes through historic cemeteries is actually quite common in cities and towns across the country, and can be an excellent use of a public resource, as well as raising awareness of the historical significance of the area. In my home town of Bozeman, Montana, trails through a large cemetery are an integral part of a fantastic public trail system that encourages walking, running, cycling and cross country skiing and adds greatly to the livability of the town.

Please do not let the voices of a few fearful residents drown out those of a community that seeks appropriate and healthful use of public space. The logistical challenges of making this connection are all very solvable and this project should proceed with full support of the City Council.

Hello,

I support the proposed Pioneer Cemetery trail connector. I encourage city leadership to approve the proposal, as it fits with a vision of increased human powered transportation, use of resources, and outdoor recreation.

Thank you for your consideration.

Subject: Proposed pathway through the Pioneer Cemetery

To whom it may concern:

My name is Brian Goforth and I live in Vancouver, Washington. My connection to the Pioneer Cemetery is a very dear one. My great-grandparents, Thomas Marshall Eckhart and Rose Mary Eckhart, are buried there. Thomas Eckhart is a name etched in Salem history, as he was an officer with the Salem Police department in the early 1900's. On October 1, 1909, he was shot in the line of duty and subsequently died the next day from the wounds he sustained from the shooter. He left behind his wife Rose, who I just mentioned, plus 5 children, including my grandmother Opal Eckhart Goforth, who was only age 5 when her father was killed. To my present knowledge, he is the only Salem Police Officer who has ever died in the line of duty. While my grandmother barely knew him, and my father, his grandson, never had the chance to know him, his grave represents the life he lived and gives our family tangible proof of his existence.

While the graves of my great-grandparents are not near the proposed pathway, I have great concerns about creating a passage through the old cemetery. I have visited the cemetery on a number of occasions and I have noticed that there are many large stones in varying stages of wear and some that lean precariously. I worry about their stability. Among the reasons supporting the creation of the pathway is that it will allow children from the neighborhoods on either side of the cemetery to have a better connection for visiting. I think encouraging children to pass through the cemetery is a dangerous suggestion. Children may decide to play among the tombstones, games such as "hide and seek," "cops and robbers," or ride their bicycles among the markers, and, being children, could be careless and unaware of the dangers the heavy stones could present. Older children and youth may see the stones as a great place to place graffiti or otherwise deface the stones. In my opinion, the cemeteries are not that large and it is not a very great inconvenience nor does it take that much time to go around them.

Another supporting reason for the pathway is that it would provide an opportunity for families to walk through the graveyard and teach the children about people who lived in Salem in its early years. I maintain that such an opportunity already exists and I would wonder how many families are doing such a thing now. There is an easily accessible entrance to the cemetery, even if it means walking or driving a few extra blocks to reach it.

I have always been impressed by how the cemetery is a open, quiet space in the middle of a busy city, even with Commercial Street bordering it! I believe it should be preserved as such. I believe that making a pathway through it will compromise its reverence and serenity. While I appreciate the sentiments and intent of the proponents of the pathway, I believe the harm and potential harm a pathway will create far outweighs the proposed benefits.

Please reject this proposal. I am sure there are many other ways the City of Salem can spend money to improve connection and livability of these neighborhoods.

Thank you for allowing me to present my opinion,

Brian Goforth

Councilor Nordyke,

We support the creation of a path for pedestrians through the Pioneer Cemetery. The path would really encourage foot traffic to the retail areas south of the cemetery because walkers and bikers could avoid Commercial Street (which is noisy and unpleasant). Encouraging people to walk in the cemetery might also decrease opportunities for mischief in the cemetery due to an increase in eyes on the place.

Thanks for considering this request,

Christine

Subject: Pedestrian Path through Pioneer Cemetery

Dear Councilor Nordyke,

I am very much in favor of a pedestrian path through Pioneer cemetery connecting my neighborhood south of the cemetery with the Fairmont neighborhood.

My house sits On the corner of Sunrise and Lorida, directly across from the park in Fairmont—an easy walk if there was access. Yet, when my two sons were small I had to push them in a double stroller down to Commercial over to Rural and up the hill if I didn't want to drive to the park. And when they were in elementary school I never felt comfortable allowing them to walk down to that major road without me to access the park or neighborhood. So unfortunate.

Thank you for giving this issue a voice.

Best,
Dawn Douglas-Gienger

Subject: John/ Hoyt trail

I am still totally apposed to this gate conection! It is to dangerous and will imposes the crimial element onto my street! It is not visable from Rural St. And is to high in risk for potential pedestrian to get injured!! I already see people looking to tocut thru from John st to the cemetery. So someone is telling people it already exists!! Really disappointed in the city council and neighborhood association for not coming and talking with home owner prior to proposal!

My daughter home is 2025 John st.

None of the renter or home owner on this street or private drive to the proposed gate trail wants this. Teally unfair for ither whom don't live there towant something thats never going to effect thier livelihood! How about We come walk in thier provate court yards!!

Re: Rural-Hoyt Trail Connection

Date: April 22, 2020

Background/Context. For those members who were not on the Salem City Council in 2012-2013, or 2004-2005, or even as far back as 1985, please be aware that various prior City Councils have ultimately, repeatedly rejected a Rural-Hoyt Trail connection, also known as Pioneer Cemetery Path.

Most of the alley abutting the north side of the cemetery was vacated in 1987 and ceded not to the Cemetery, but to the adjacent properties. The perimeter fence was installed in that same timeframe. The effect of these measures was to control the area, reduce risk of hazards, and stop vandalism. Access today through a gate would defeat the protection the fence was built to provide.

Legal Viability. Should the City Council vote in favor of a motion to reopen a discussion between proponents and opponents, city lawyers should be the first to be consulted for the legal viability of such a trail or path.

The legal posture of the situation has changed since the City Council's last consideration in favor of a stronger position for the opponents. At the outset, the staff report should consider the cost to the taxpayers to pursue a trail or path, a goal that seems to be perpetuated by only a few constituents.

In part, the circumstances have changed: (1) an interim LUBA remand makes it clear that this matter falls under the Goal 5 inventory of historic resource; *see, for example*, Department of Land Conservation and Development OAR 660-00-23-0200; (2) additionally, since the City Council's last consideration, Pioneer City Cemetery has been registered as a State Historic Landmark with the Historic Preservation Plan now a prerequisite to change. Exhibit A

Cost to Taxpayers. The trail or path at this time will substantially impact the market value and use of the abutting properties such that the damages would be required to be paid pursuant to law. The impact would be to significantly decrease the market value of at least three to eight abutting properties. The average market values of homes in the south Salem neighborhood is in excess of \$450,000. Exhibit B.

City Path or Trail Already Exists. Residents of the area have an alternate path, Fairmount Park Trail. Perhaps the City could alert the Citizens and the Schools in the area of the existence of the Fairmount Park Trail. A path through Pioneer Cemetery would be a second path.

As to those who desire to teach children to respect Pioneer Cemetery, the Cemetery already has access from Hoyt Street. The existing access from Hoyt Street fosters peaceful quiet appreciation, serenity, reflection and respect.

In sum. It is time to make this decision and close this book on a path through Pioneer Cemetery because it is extremely expensive to go after this duplicate trail over and over again.

SALEM PIONEER CEMETERY LISTING IN THE NATIONAL REGISTER OF HISTORIC PLACES

Salem Pioneer Cemetery, located at Commercial Street SE and Hoyt Street, was listed in the National Register of Historic Places under its historic name, Odd Fellows Rural Cemetery, on September 11, 2013. The City-owned property of seventeen acres has the registration identification number 13000707. The 72-page nomination document includes, in addition to a narrative, ten exhibits and twenty-five photographs. It is reproduced on our Web site in its entirety courtesy of the Oregon State Historic Preservation Office. When citing the document for research purposes, the recommended form is: Odd Fellows Rural Cemetery, National Register of Historic Places Registration Form prepared by Elisabeth Walton Potter, Friends of Pioneer Cemetery, February 28, 2013.

The burial ground was founded by Chemeketa Lodge No. 1 of the Independent Order of Odd Fellows in 1854 and has been known as Salem Pioneer Cemetery since 1954. Friends of Pioneer Cemetery prepared the application for the City of Salem Parks and Recreation organization, citing the property's significance to the city and state as an outstanding cultural landscape in the 19th century Rural Cemetery tradition and as the final resting place of founders and leaders of Oregon government, institutions, commerce, and industry.

SALEM CITY COUNCIL MEETING

April 27, 2020

Agenda Item No. 2 - Public Comments on Proposed Connector Path through Pioneer Cemetery

Elisabeth Walton Potter

2655 Skopil Ave S

Salem OR 97302

Mr. Mayor and Ladies and Gentlemen of the Council:

I am Elisabeth Potter, resident of South Salem Ward No. 7 and a founder-member of the citizen support group - Friends of Pioneer Cemetery.

My statement highlights below what our volunteers and supporters do to help the City raise its level of care for the historic cemetery, but mostly I want to make a point here that is often overlooked in conversations about a hypothetical Rural Avenue-Hoyt Street connector that could affect a City landmark having Goal 5 status under statewide land use planning rules.

Anyone taking stock of the cemetery landscape from a simple visual perspective might easily assume there are tolerances for inserting one thing or another into a tightly-bounded gridiron plat with a few lanes, a scattered tree canopy, and more than eight thousand graves, marked and unmarked. What the casual observer probably will not know is that, notwithstanding a number of exceptions for City and County-owned graves for institutional burials, the grave lots are not publicly owned. The vast majority of grave lots passed to descendants of original plot owners from the 1850s onward, and, with few exceptions, the exclusive descendant's right-to-inter has not been extinguished. Although more qualified terminology is applied by the Oregon Mortuary and Cemetery Board today, the continuing status of the grave lots as essentially private property is one important reason why space for widening or fencing existing lanes is restricted. Also to be remembered is that any development undertaken along the cemetery's boundaries risks encroaching on irregular, early, unmarked burials on the outer margins of the plat.

We are your citizen advisors in the special effort of caring for Pioneer Cemetery, and we have been pleased to serve in that role since shortly before the City took title to the property from the Independent Order of Odd Fellows thirty-four years ago. We are confident that City staff will, if called upon, provide the kind of rigorous professional analysis that will help all of us resolve the dilemma of conflicting land-uses that is once again under discussion.

Primary Purposes of the Friends of Pioneer Cemetery organized in 1985

- Support City Parks Operations in the effort to maintain, protect, and improve the historic cemetery landscape and its monuments; direct the efforts of community volunteers in grounds-betterment.
- Promote contributions to the Salem Foundation Charitable Trust Pioneer Cemetery Fund; maintain public and donor relations through an annual report-newsletter.
- Manage the Pioneer Cemetery Website and database (www.salempioneercemetery.org); respond to ongoing requests for information on burials, genealogy, and headstone care.
- Assist City Parks Operations to define scope of work when contracting for professional repairs; help write grant proposals for the City's special preservation projects endorsed by the Salem Historic Landmarks Commission.
- Promote public education through occasional tours, programs, and periodic off-site presentations. Maintain FOPC administrative records that include reports on completed projects.

Rural-Hoyt Trail Connection, Linking Neighborhoods Salem City Council Meeting, April 27, 2020, Agenda Item_____

Thank you, Councilors, for your service. I am Evan White, Land Use Chair of the Sunnyslope Neighborhood Association, and I testified on this issue seven years ago. Who knew that people like to walk? Not having a street or path that connects Hoyt and Rural is a mistake that likely predates anyone now working for the City. There is an easy way to address this issue while showing respect for both the living and the dead. It is time to fix the mistake.

The Dead

My great grandmother came to Salem via the Oregon Trail in 1847, with her parents, brother and sister. She was only nine years old and she lived to be nearly 102 years of age. Her ashes are interred at the Mausoleum at Mt Crest, adjacent to Pioneer Cemetery. So, I believe that it is very important to honor our ancestors and respect our pioneer heritage. Today almost all adults and many children have cell phones and are able to instantly summon help if there is an emergency or see something amiss. Having people able to walk through Pioneer Cemetery during daylight hours will improve security and enrich public appreciation for our pioneer heritage.

The Living

I've lived in Salem for almost fifty years and the first house that I owned was on Fairmount Hill.¹ When we moved there, my two sons met Tad, the boy living next door, and found a ready playmate. All three boys soon became inseparable -- like the three musketeers. They were either over at our house or at Tad's house. This continued for years, until Tad's mom sold her house and moved to Candalaria. At that point it became very difficult for the boys to continue their friendship because they were now separated by Pioneer Cemetery -- with no easy or safe way to walk or bike from one house to the other.

When my older son moved to McKinley School, many of his classmates lived on the other side of the cemetery, so he had no way to continue his school friendships. Children who live south of the cemetery cannot easily access the playground at Fairmount Park.

¹ When I lived there, I frequently walked to work and took the bus home. I now live near Belcrest Cemetery, which encourages pedestrian use of the cemetery.

Salem is expected to grow by 60,000 people over the next sixteen years. "Our Salem Report Card" says that we are falling behind from some of the goals that we have set for ourselves, such as walk and transit friendliness, bicycle and pedestrian use, greenhouse gas emissions, and air pollution from travel. Residents are becoming less optimistic about the direction of our City. While the staff report on this issue is not yet available, my hope is that it will present a constructive way to link the two neighborhoods. Thank you.

March 11, 2019

To Mayor Chuck Bennett and Members of the Salem City Council:

Thank you for taking your time to consider the comments of those interested and impacted by the proposal for the creation of a new point of access to the Pioneer Cemetery. As a homeowner at 466 Rural Avenue South (essentially the intersection of Rural Avenue and John Street,) my property is immediately adjacent to both the cemetery and the location of the proposed gateway. I am interested in this project not only as an impacted homeowner, but also as a professional public historian. I hold a master's degree in public history from the University of Colorado, as well as a certificate in historic preservation. I earned a bachelor's degree in history, and I have worked full time as a public history consultant for four years.

I'm writing to you today because I firmly believe that the City Council has a unique opportunity to affirm the purpose of preserving and maintaining cemeteries in the twenty-first century. In my professional opinion, I believe that it is important for society to choose to protect and preserve cemeteries for three distinct reasons. These reasons and the ways in which they impact a gate decision are summarized in three paragraphs below.

We carry the burden of honoring, mourning, and otherwise commemorating the lives of those who came before us. Each marker and indeed each unmarked plot in a cemetery is the final embodiment of *someone's* life. A shared aspect of our humanity is the collective promise to never forget the contributions of our predecessors.

Currently, access to Pioneer Cemetery is relatively limited. A desire to exclude any potential danger has led to a wide misunderstanding among the community of its purpose and nature. However, those who have visited have often found that cemeteries impart lessons of history. They provide a tangible link to, and record of, our historic past. The Cemetery has acknowledged this with the installation of interpretive signage, but they have not encouraged access or visitation by the public. In this way the Cemetery has come dramatically close to but fallen short of fulfilling the ultimate goal of historic interpretation. That goal is the provocation of interest,

and the desire of the public to learn more and become further involved.

Cemeteries are not just places of burial and reflection on the dead. They are also places where meditation, casual encounters among friends and neighbors, and indeed even “recreation,” can occur. We don’t want them to replace parks, but they have no sanctity at all if they are locked away from the public. Cemeteries can be havens for bird watchers, a silent pass through for cyclists, and places of inspiration for artists. They are maintained in part *by* the public, they should be *for* the public.

What binds all of these categories together, is the critically important element of public access. If we choose not to foster these aspects of cemeteries that are important to our community, then cemeteries become only toxic fields of stone. Literally dead and dying in every way. For the health and wellbeing of a connected and informed community, I join my neighbors in asking the City Council to take whatever steps are necessary to allow for increased community access to the Pioneer Cemetery. With coordination, patience, and some compromise, I have great confidence that it can be achieved. Thank you very much for all of your time and consideration.

Sincerely,

Evan West

April 22, 2019

To Mayor Chuck Bennett and Members of the Salem City Council:

You have previously received a letter with my commentary in support of the Pioneer Cemetery pathway proposal. I had hoped to deliver this follow up commentary in person but due to our current world situation it seems that will be impossible for an indeterminate amount of time. Thank you very much for considering this perspective in the same manner that you would if it were delivered to you in person.

I would like to read for you from the *Salem Pioneer Cemetery Preservation Handbook* published jointly by the City of Salem and the Friends of the Pioneer Cemetery. On page one the handbook reads

Besides a burial ground, the park-like setting has a variety of uses. It is an open space for walking and jogging, a wildlife habitat, an outdoor classroom and museum, and a resource for genealogical research. Since the Salem Pioneer Cemetery serves many interests and activities, these guidelines are intended to help preserve the historic character of the cemetery for future generations to appreciate.

By this statement, it's apparent that the City and the Friends of the Cemetery recognize their role as the guardians of a place of public gathering and utility. Today I join my friends and neighbors in asking the city council to ensure that the cemetery remains accessible, and better promotes accessibility, to all.

As a professional historian I have studied the assets of the Pioneer Cemetery and can attest that the construction of an entrance off of John Street can be undertaken without causing any adverse impact. As hours of access will remain the same, the possibility that crime or vandalism might increase is small to none. Adding a second point of access to the cemetery encourages community engagement, and to my knowledge the opposition have provided few rational arguments against the possible creation of a second gateway. The dedicated and passionate volunteers who compose the Friends of the Pioneer Cemetery are rightfully invested in ensuring that the historic treasure is protected. What I would like for the Friends of the Cemetery and the Salem City Council to know, is that the neighbors who share property lines are equally dedicated to the same mission.

Thank you very much for your time and consideration of this perspective. I am happy to be contacted at any time with follow up questions regarding historic preservation, public history, or any other aspect of this project and proposal.

Sincerely,

Evan West

Categories: Council Dox

Dear Council Members,

My wife, Annie Francoise, sent the attached message to you on March 14th regarding the path through the cemetery. I would like to add my comments.

There are safety and community aspects as she has pointed out but there are also just basic health and convenience reasons. I know that many folks on the Fairmount side are enthusiastic walkers for health and recreation purposes. I assume that Candelaria folks are the same. We walk all over Fairmount hill and it would be delightful to be able to include the cemetery and Candelaria areas within our walking range. This is good for all of us.

Also, we would love to combine the joy of walking with some convenience. At times, we have made the trek to LifeSource for a deli lunch or light shopping but the section along Commercial is hardly inspiring or pleasant. So, mostly we drive - adding more car trips and inherent pollution. How pleasant it would be to be able to take a stroll through the cemetery to do these things. There are other businesses in the vicinity that could be considered destinations as well.

We hope that you will favorably consider opening the walking passage through the cemetery.

Thank you for your consideration,
Gary McCuen - 503 302 90543

Subject: Passage above the Pioneer Cemetery
Date: March 14, 2020 at 5:01:26 PM PDT
To: citycouncil@cityofsalem.net

Hello, everyone, thank you for your interest in this matter.

We live on Fairmount Hill near the Park. We intended to attend the meeting on Monday evening. Unfortunately, I am 76 and Gary 84 and we were advised to stay home, to be on the safer side, not to contaminate or be contaminated.

I am one of the volunteers who attended the Cert Training with Roger a few years back. At the time, Roger was quite insistent regarding having open passage between our neighborhood and Candalaria in the event of a major earthquake. We were all in agreement. Roger was recommending having a container in Fairmount Park, stocked with emergency food and supplies which could be shared by both neighborhoods as well as an opening which would allow emergency vehicles and first responders to go

back and forth. We are still all waiting for such an opportunity!

Also, Fairmount Park is THE park for both neighborhoods and Candalaria was cut off when gates were set up as an overreaction to a one time episode of vandalism. Just not fair.

Both sides of the cemetery would still be protected if the fenced passageway would be open at each end.

Please, pretty please, make this happen this time. Safety and good fellowship could serve us all.

We are so grateful for your efforts to represent us all.

Hello Councilor Nordyke,

I reside in the Fairmount neighborhood on Saginaw Street and would really love a pedestrian connection through Pioneer Cemetery to exist for a safer and more pleasant walk or bike to shopping, restaurants, and friends over in the Candalaria area. I don't expect this passage to remain open after dark, which I understand raises some concerns about vandalism in our historic cemetery. Let's create a more connected community!

All the best with this initiative,
Jeremy Greenwood

Hi!

I am writing to ask that you support a pathway through the Pioneer Cemetery connecting my Fairmount neighborhood to Candalaria. Not only would that provide a nice path to LifeSource Foods, but my daughter and grandchildren live in that neighborhood. Currently, I walk through the woods at the end of Rural to visit them, but I must admit, I do it with a little trepidation.

Thank you for all you do for our community.

I support the logic, common sense action of the Pioneer Cemetery connector. This will be a positive move for the neighborhood in terms for people and for wildlife. This old-thought public barriers need to go.

Thank you,
Joanne Meister

Thank you, Karen, so much for your thoughtful email. I appreciate your sensitivity to the needs of historic preservation and your support for a pedestrian path. I wholeheartedly agree with the opportunity for increased cultural appreciation for the cemetery as a result of opening a path. I will forward your email to city staff so that it can be added to the members of the public who are writing in to support this path.

I hope that you and your loved ones are staying healthy during these uncertain times! As your City Councilor, please do not hesitate to reach out to me with any other neighborhood questions or comments. Sincerely, Vanessa

Subject: Path between Fairmount and Candalaria

Dear Councilor Nordyke,

I am a ten-year resident of the Candalaria neighborhood. I was thrilled to hear that the discussion regarding a path that would connect my neighborhood with Fairmount has regained some traction. It was disheartening for me when the discussion was started and then dropped a few years ago.

There are many families and friends who live on both sides of the barrier that is currently in place who do not get to visit each other safely, especially with small children. There are businesses that are not as accessible to residents who walk or bike in order to buy groceries, go out for a meal, etc. The current configuration demands that we all travel by car even to nearby destinations, which reduces the liveability of both neighborhoods. Walking and cycling on Commercial Street is neither safe nor enjoyable.

I understand the concerns that have been raised by Friends of Pioneer Cemetery - indeed, I have been a volunteer myself, cleaning up the grounds with the Friends. I care deeply for the preservation of this historic gem and I would

never push for anything that would cause its demise. I strongly believe that allowing passage alongside the cemetery would not be a detriment, but rather would cultivate appreciation for the Pioneer Cemetery even more, made possible by the fact that many more people would be able to see it, learn about it, and enjoy its beauty and history. Certainly careful planning would need to be done to ensure the safety of some of the gravestones, but I believe that there are many possible creative solutions that exist and that we can trust our City and neighbors to establish and maintain appropriate preservation measures.

Please consider my strong support for creating this connection between these two vibrant neighborhoods that would benefit families, friends, and businesses--basically everyone and everything in this whole area, including the Pioneer Cemetery.

Thank you!

Hi Ms Nordye,

I wanted to email to show my support for a cemetery path between Hoyt and Rural --- seems like a great way to connect our neighborhoods, and keep our kids off Commercial! Thanks,

Subject: Pioneer Cemetery Pathway

Dear Mayor Bennett and Members of the Salem City Council,

I am a 3rd (or maybe 4th) generation Oregonian, born and raised in Salem, as were both of my parents. I am also a grateful supporter of "Friends of Pioneer Cemetery" since I have multiple family members at rest there including my grandparents William and Emma Butte and Guy and Hazel Causey.

I agree with the position of the Friends of Pioneer Cemetery, that a pathway should not be opened up through the Cemetery. I believe the risks for vandalism, plus potential liability issues related to aging headstones is reason enough to say no. If the council, however, believes the benefits outweigh the risks, then fencing of the pathway should be required.

Respectfully,

Lauren Butte Hoyez

Subject: Support for Pioneer Cemetery gated pedestrian connection

Dear Counselor Nordyke,

I am writing in support of a proposal to study installation a pedestrian path in the vicinity of Pioneer Cemetery. I have been a resident of the south central neighborhood for five years. I take regular long neighborhood walks for exercise and am very supportive of efforts to allow residents to more easily spend time outside and connect with our neighbors while reducing vehicle use. I live south of Pioneer Cemetery, and pick up a weekly Community Supported Agriculture (CSA) distribution from a home north of the Cemetery. I am therefore well-aware that the lack of a connection through the cemetery creates a significant barrier for walkers traveling between the north and south portions of the neighborhood.

A pedestrian connection near the cemetery would be a valuable asset to the community. By providing increased foot passage that avoids the busy traffic on Commercial Street, the path will support the goals of building more connected and livable communities while supporting the safe use of alternative transportation. If this connection were installed, I would use it regularly to visit friends, pick up my vegetables, and exercise. For residents north of the cemetery, the connection would provide safe and enjoyable pedestrian access to businesses, including restaurants and grocery stores, located south of the cemetery.

Finally, I understand that the city council has many very important priorities before it that will, and should, take precedent over this small proposal. Even in times of great need, however, it is also important to also take those simple, low cost measures that can provide significant quality of life benefits to residents. I believe that this is such a proposal and therefore strongly support further exploring a pedestrian connection near the cemetery.

Thank you,

Maureen McGee

Subject: Pioneer Cemetery Connector

A couple months ago, I had a good look at what would be involved in opening a connector trail through the north fence of the Pioneer Cemetery.

I've had a formal class on trail-building, and have worked to build trails in Oregon and Arizona, including the Croisan Scenic Trail and the Sprague-Skyline Park trails.

The Pioneer Cemetery connector will not be as simple as installing a gate in the fence, because of the proximity of graves on one side and a 2-foot retaining wall on the other side, so it will take some effort, but as an engineer it could be done, in my opinion.

Having ridden my bike from my home in South Salem to downtown, I know this route would make that trip much easier and especially safer.
