**TO:** Mayor and City Council

**THROUGH:** Steve Powers, City Manager

**FROM:** Peter Fernandez, PE, Public Works Director

**SUBJECT:**

Intergovernmental Agreement with Marion County for Asphalt Slurry Seal Surfacing on City Streets and at the Willow Lake Wastewater Treatment Facility.

Ward(s): Ward 7  
Councilor(s): Cook  
Neighborhood(s): Sunnyslope  
Result Area(s): Safe, Reliable and Efficient Infrastructure

**ISSUE:**

Shall the City Council authorize the City Manager to execute an Intergovernmental Agreement with Marion County for the design and construction of an asphalt slurry seal surfacing project on various City streets and at the Willow Lake Wastewater Treatment Facility?

**RECOMMENDATION:**

Authorize the City Manager to execute an Intergovernmental Agreement with Marion County for the design and construction of an asphalt slurry seal surfacing project on various City streets and at the Willow Lake Wastewater Treatment Facility.

### **SUMMARY:**

The proposed FY 2019-20 operating budget will include funds to complete slurry seal maintenance activities on various City streets and at the Willow Lake Wastewater Treatment Facility. Marion County has a project to complete the same type of maintenance work on several County roads. Since both projects are going to occur this summer, public funds can be saved by one local government preparing the design plans and managing a single construction contract for both agencies. Staff expects that better construction bids will be received by combining the County and City work into a single project.

### **FACTS AND FINDINGS:**

Funds will be programmed in the recommended FY 2019-20 operating budget to accomplish the asphalt slurry seal work. The Intergovernmental Agreement (Attachment 1) includes approximately \$45,000 for work on City Streets (Attachment 2), \$100,000 for work at the Willow Lake Wastewater Treatment Facility, and \$5,000 for Marion County labor and services.

City staff will develop traffic control plans, perform field inspection activities, and provide public notifications for the City streets.

The City will reimburse the County for the actual design engineering and construction contracting costs for the City work.

All work is scheduled to be completed this summer.

### **BACKGROUND:**

The County has provided these services to the City in the past and has staff available to perform the work. An Intergovernmental Agreement is required for the County to complete the design, bid a construction contract, and manage construction activities for the City.

Brian D. Martin, PE  
City Engineer
